

Hello Parents and Guardians-

Your school district has partnered with Chenango County Behavioral Health Services to offer mental health treatment for identified students right at your child's school. Services are currently being provided both in person and via telehealth. As a result of that partnership, we are offering free Early Recognition Screenings to help parents assess their child's emotional health. This screening is being offered to all children within your district.

The online screening survey is a brief emotional and behavioral tool for children, ages 4-17, to help determine if further assessment may be beneficial. The screen does not diagnose, but is intended to help parents be proactive and get extra support for their child if it might be needed.

When you fill out the screening, please follow the directions, and select the option you feel describes your child best. **The survey will calculate the score so that you can see the results of the screening after you complete the survey.** You will need to follow the link and fill out the screen for each child in your home separately. If clicking on the link doesn't work, please copy and paste it into your browser.

Link: <https://getfoureyes.com/s/7edUo/>

If the results indicate a score of 28 or higher, feel free to contact your child's school counselor, email me, or call Chenango County Behavioral Health at 607-337-1600.

Please take the time to complete this screening for your child. Your participation could be a valuable step in determining the emotional and behavioral health of your child during these challenging times. If you have any questions, would like help interpreting results, or want any information on services that might be available to your child/family, please feel free to contact me directly by email: [LMillett@co.chenango.ny.us](mailto:LMillett@co.chenango.ny.us).
